

COURSE DESCRIPTION

1. GENERAL

SCHOOL	ENVIRONMENT, GEOGRAPHY AND APPLIED ECONOMICS		
DEPARTMENT	GEOGRAPHY		
LEVEL OF COURSE	Undergraduate		
COURSE CODE	ΓΦ1001	SEMESTER	3rd
COURSE TITLE	ECONOMIC GEOGRAPHY		
STRUCTURE OF TEACHING ACTIVITIES		TEACHING HOURS PER WEEK	NUMBER OF CREDITS ALLOCATED (ECTS)
Lectures and Laboratory Classes		3	5
TYPE OF COURSE	Compulsory		
PREREQUISITES	-		
LANGUAGE OF INSTRUCTION	GREEK		
COURSE OFFERED TO ERASMUS STUDENTS	NO		
(URL)			

2. EXPECTED LEARNING OUTCOMES

<p>Learning outcomes <i>Describe the objectives of the course as well as the expected learning outcomes</i></p>
<p>EG explores the interplay between economic activity and space. After the successful completion of the course students should:</p> <ul style="list-style-type: none"> • <i>be familiar with the basic concepts and methods of Economic Geography;</i> • <i>understand the significance of location in the success/failure of economic activities;</i> • <i>be able to identify and interpret the decisive factors that influence the location of manufacturing, services and retail trade;</i> • <i>recognize in which ways the location of certain activities affect the developmental trajectory of the wider region and the welfare of its inhabitants.</i>

3. COURSE CONTENTS

<p>1. The formation and the early stage approaches of the EG. Key questions raised by the EG. A concise evolution of the theoretical debate. The structure of the lectures.</p> <p>INDUSTRIAL LOCATION</p> <p>2. Old and new restrictions in industrial location. Technological developments and location change. The changing importance of access to energy. Locational inertia. New restrictions stem from the renewable energy sources.</p> <p>3. Agricultural raw materials and minerals. The pioneers: Von Thunen (1826) and Weber (1912). Primary and secondary processing industries.</p>
--

4. The increasing use of semi-processed and imported inputs. New organisational forms of manufacturing activity, vertical disintegration and subcontracting. Recent changes in international trade. The environmental impact of the long-distance transport.
5. Labour force. Geographical distribution of availability, skills, wages and productivity. Intra-national and International mobility. Brain drain and brain gain.

URBAN CENTERS AND INDUSTRIAL LOCATION

6. Manufacturing and the city. The traditional significance of the cities (inner cities). Positive and negative agglomeration externalities. Localization Economies. Headquarters, Research & Development and skilled manufacturing activities. SMEs and the city.
7. Concentration of services in the cities. The central place theory (Christaller). Business Services. The traditional business, administrative and retail city centre. ICTS applications in office tasks. Back Offices.
8. Different locational requirements by different types of retail firms. Hotelling duopoly model. Retail chains. Location strategies of retailers within urban centres. Development of stores networks. The prospects of e-commerce.

SYNTHESIS

9. State policies and industrial location. Regional and Industrial Development incentives. Industrial parks and industrial areas.
10. Synthesis / introduction to Geography of Globalised Networks course.

4. TEACHING AND ASSESSMENT METHODS

TYPE OF LECTURES	face to face in class and laboratory lectures	
ICT USE	ICT use, Internet use and e-class	
TEACHING STRUCTURE	Activity	Hours per semester
	Lectures	32
	Laboratory	7
	Studying	95
	TOTAL	134
ASSESSMENT METHODS	<p>Assessment Language: Greek</p> <p>Assessment Methods Written exam at the end of the semester with questions that ask for longer - essay type - and shorter - multiple choice - answers.</p> <p>The assessment criteria are notified to students at the beginning of the semester</p>
